The 17th Exhibition for Electrical Equipment covered all areas related to power production, transfer and distribution. The 8th GCC – Cigre International Conference provided a specific platform and opportunity for the various parties in the power sector that discussed the issues and challenges that were faced in the region.

GCC Power 2012 was hosted by Sultanate of Oman; their power sector had a lot of improvement and entered a new stage of development, followed by the launching of Oman Power and Water Procurement Company (OPWP). A significant increase in the demand of power and water in the Sultanate.

The topics that were discussed related to electrical power with more than 75 technical papers, 2 tracks for the conference, and more than 284 professionals who attended from GCC and other Arab countries.

For another great opportunity and to learn more about the latest developments in the power sector for this year event GCC Power 2013 will be in Abu Dhabi, UAE.

OPENING CEREMONEY

GCC Power 2012 was hosted by Sultanate of Oman; their power sector had a lot of improvement and entered a new stage of development, followed by the launching of Oman Power and Water Procurement Company (OPWP)

THE CONFERENCE

75 Speakers

2 Conference Tracks

224 delegates

60 Tutorial

284 Total Attendance

PRE-CONFERENCE TUTORIALS

Tutorial 1

Revised IEC specification and maintenance guide for mineral insulating oil

Tutorial 2

Design & Applications of reactive Power Compensation Systems

MAIN TOPICS

Track A

- Development of Renewable Energy in the GCC
- The Solar Value Chain: From Manufacturing to generation
- Why and when is Solar Energy cheaper than Fossil Fuel
- Abu Dhabi – Masdar Shams 1 Project
- DEWA Mohamed Bin Rashid Al Maktoum 10 MW Solar Park
- System Planning, Development and Technical Studies
- System Operation and Control
- Substation Automation
- Smart Grids
- Power Transformers
- HVDC and Power Electronics

Track B

- Asset Management for Power Systems
- Developments in HV Insulators
- Substations and HV Equipment
- Renewable Energy Development
- Protection Systems

Papers were submitted
from Countries for the
first time such as:

Bahrain, Deutschland, France,
India, Italy, Spain

GCC Power 2012 expo inaugurated

The 2012 GCC Power 2012 conference and exhibition was inaugurated in Muscat, Oman, on November 5, 2012. The event is organized by the Oman Electric Power Association (OEPSA) and the Oman Electric Power Association (OEPSA) in cooperation with the Oman Electric Power Association (OEPSA) and the Oman Electric Power Association (OEPSA).

The inauguration ceremony was held at the Muscat Convention Centre, where the OEPSA Chairman, Mr. Sultan bin Saif Al-Saidi, presided over the event. He welcomed the guests and expressed his confidence in the success of the conference and exhibition.

The conference will focus on the latest developments in the power sector, including the role of renewable energy, smart grids, and the challenges of integrating intermittent energy sources. The exhibition will showcase the latest technologies and equipment used in the power industry.

Oman linked to GCC power grid

In the second phase, Oman was connected to the UAE and in the third phase, the Sultanate was connected to the rest of the GCC nations.

Announcing the GCC Power 2012 Conference and Exhibition to be held from November 12 to 14 at Muscat Convention Centre, Dr. Ali Al-Ghaili, vice-chairman of Electricity and Water for International Relations and Information of the PARW said that the Sultanate was connected to the UAE in the second phase and in the third phase which was

the grid, which helps GCC states meet steadily rising power demand and avoid power outages, linked Bahrain, Qatar, Saudi Arabia and Kuwait in the first phase.

The grid aims at guaranteeing an adequate supply of power even in emergency and also reducing the cost of power generation in member countries.

About the conference, Dr. Ali Al-Ghaili asserted that the conference will discuss current developments in the region, experts, researchers and investors from around the world to deliberate on the present and future of the electricity industry in the Gulf region and ways to develop dynamic sector. Projects have been carefully selected from over hundreds of projects worldwide that have been submitted to the technical team for pre-qualification during the conference. The conference will also be attended by hundreds of industry experts and senior executives of the GCC CIGRE from across the Arab world and international CIGRE research committee representatives, he added.

IGC industry experts

Engineer Chuan Al-Khawali, advisor for transmission and planning affairs, Oman Electricity Transmission Company (OETC), Georgetown, expressed his confidence in the success of the conference and exhibition. He said that the conference will provide a unique opportunity for industry experts to share their experiences and challenges facing the power sector.
